Projects: -

1. Student Learning Management System

Project Description: -

The Student Learning Management project aims to enhance educational experiences through a Salesforce-based system. Leveraging Lightning Web Components (LWC) for dynamic user interfaces, an Apex class will handle backend logic ensuring seamless data processing. User creation and administration functionalities will be implemented to manage student and administrative accounts efficiently. Administrators will have access to comprehensive tools for curriculum management, grading, and resource allocation. Additionally, features like progress tracking and communication channels will foster a collaborative learning environment. By integrating Salesforce's robust capabilities, this project empowers educational institutions to streamline operations and optimize student learning outcomes.

Key Implementation Expertise:-

- Design and development of Schema
- Creating data model custom objects and fields
- Creating LWC component and Flows
- Use of Lightning record edit form, lightning button, table,Data Table.
- Developing Apex Class for New User Creation
- Automatically Certificate PDF generation Using JS file.
- Embedding Youtube VIDEO in Salesforce org
- Course tracking system along with user course tracking system

2. HR Management:

Project Description: -

The HR Management Lightning Web Components (LWC) project aims to develop a comprehensive web-based application tailored for efficient human resources management within an organization. The application will leverage the Lightning Web Components framework, ensuring a modern, responsive, and scalable user interface that aligns with Salesforce's design principles.

Key Implementation Expertise:-

- Design and development of Schema
- Data Model(Custom object and fields)
- Use of Wire Adapter
- LWC with Apex (CRUD) operation
- Creating LWC component and Flows
- Use of Lightning record edit form, lightning button, table,Data Table.
- Developing Apex Class for New User Creation

3. Portfolio Builder with chatGpt Integration

Project Description: -

The application provides relevant information to potential employers about your skills, experience, and projects you've worked on. Your portfolio builder is like your online résumé. Potential clients and hiring managers can easily find you online and check out your previous projects and skills.

Key Implementation Expertise:-

- Integration with chtGpt
- Component Creation and Layout Designing
- Styling CSS, SLDS Library,LWR
- Use of Tabs and Accordions
- Data Model(Custom object and fields)
- Related list
- Use of Wire Adapter
- LWC with Apex (CRUD) operation
- Sharing Setting
- Profile Setting

2. **Universal College of Engineering ,Mumbai**: - April 2020 to October 20

    Designation:- Assistant Professor(UGC)

    Achievements
- Delivert Expert Lectures in Mumbai University
- Paper Setting Done in Mumbai university.
- Published 4 Papers in UGC journal.

3. Theem College of Engineering: June 2016 to May 2018

    Designation:- Assistant Professor
